SUMMARY

Full Stack Web Developer and MCA student with 1 year of industry-oriented experience through Crio.do externship, building production-grade applications with React.js, Node.js, Express.js, PostgreSQL, and Redis. Skilled in RESTful API design, JWT authentication, Docker containerisation, and test-driven development. Seeking an internship or junior developer role to deliver scalable, user-centric software.

TECHNICAL SKILLS

Frontend	HTML, CSS, JavaScript (ES6+), React.js, React Hooks, Tailwind CSS, shadcn/ui
Backend	Node.js, Express.js, REST API Design, JWT Authentication
Database	MongoDB, PostgreSQL, SQL
Caching	Redis (caching, TTL management)
Testing	Jest, Supertest (unit & integration testing)
DevOps	Docker, Docker Compose, Multi-stage Builds, Vercel, Git & GitHub

EXPERIENCE

Crio.do — Software Development Externship

2024 – 2025

Industry Externship Program | Remote

- Completed a 1-year industry-oriented externship building **10+ full-stack projects** following professional workflows — code reviews, Git branching strategies, and agile sprint cycles.
- Developed and shipped backend services with **Node.js and Express.js**, integrating REST APIs and relational databases under mentored, real-world engineering conditions.
- Applied industry-standard practices including **modular architecture, environment configuration, and deployment pipelines** across multiple production-level project milestones.

PROJECTS

URL Shortener — Full Stack Service

Jan – Feb 2026

React.js · Node.js · Express.js · PostgreSQL · Redis · Docker · Jest · Supertest · Tailwind CSS

- Engineered a production-ready URL shortener with click tracking, redirect logic, and input validation across a decoupled React frontend and Express.js backend.
- Implemented **Redis caching** for repeat redirect lookups, significantly reducing PostgreSQL load on high-frequency short URLs.
- Containerised with **Docker Compose and multi-stage builds**, enabling consistent dev/prod environments and one-command contributor setup.
- Achieved reliable API coverage using **Jest and Supertest** integration tests for URL creation and redirect endpoints.

Medify — Hospital Management System

Nov – Dec 2025

React.js · Material UI · Axios · React Hooks · Vercel

- Built an interactive hospital management frontend for managing patient records, appointments, and department data in real time.
- Integrated RESTful APIs via Axios with async error handling; designed modular component architecture using React Hooks across 10+ pages.
- Deployed to **Vercel** with CI-linked builds enabling zero-downtime updates on every push.

EDUCATION

Master of Computer Applications (MCA)

2024 – Present

Graphic Era Deemed University, Dehradun | 4th Semester (Pursuing) | CGPA: 7.24

B.Sc. Computer Science

Graduated 2023

Graphic Era Hill University, Dehradun | Percentage: 74%

ACHIEVEMENTS

- Solved **140+ problems** on LeetCode and GeeksforGeeks, strengthening DSA proficiency.
- Participated in **Smart India Hackathon**, collaborating in a team to prototype a real-world solution under time constraints.
